

PRESS RELEASE

CyberSecura becomes a partner of Pépité oZer!

CyberSecura will therefore be able to advise and support Pépité oZer student entrepreneurs on their cybersecurity and GDPR regulatory compliance issues.

GRENOBLE, April 12th, 2024 - CyberSecura, a Grenoble-based company specialising in innovative consultancy and services in cybersecurity and regulatory compliance with the GDPR, and Pépité oZer, the Pôle Etudiants pour l'Innovation, le Transfert et l'Entrepreneuriat, have recently formalised their partnership! CyberSecura will be delighted to help students with projects to anticipate, manage and master the challenges of cybersecurity and regulatory compliance with the GDPR.

Supporting students in their entrepreneurial projects

Pépité oZer is aimed at all students and young graduates in the Grenoble Academy, helping them to turn their entrepreneurial plans into reality through awareness-raising initiatives, collaboration (with other establishments and professionals), training and support. For many years now, Pépité oZer has been working with a wide range of partners to promote student entrepreneurship, in order to fulfil its mission of transferring the entrepreneurial spirit. It is in this context that CyberSecura is pleased to become a privileged contact for Pépité oZer, and in the context of supporting student entrepreneurs in their cybersecurity and GDPR regulatory compliance issues. An initial meeting took place in January 2024, during which Mr Rozier, co-founder of CyberSecura and senior GDPR expert, had the pleasure of getting to know half a dozen start-ups pre-selected on the basis of the scale of their regulatory compliance challenges.

CyberSecura, service provider to CountAct, a former Pépité oZer

CyberSecura is currently delighted to be supporting CountAct, a former Pépité oZer start-up. CountAct is a company offering an emergency evacuation management application. For the past two years, CyberSecura has been supporting the company in its application security, personal data protection and GDPR regulatory compliance issues, through outsourced timeshare DPO and CISO services. These services can start from as little as half a day a month, enabling even the smallest start-ups to begin work on securing their business and ensuring compliance.

About Pépité oZer

The UGA Design Factory's Pôle Etudiants pour l'Innovation, le Transfert et l'Entrepreneuriat (Pépité oZer) offers you training and support for your project, in collaboration with those involved in business creation (support networks, networks of young entrepreneurs, etc.). Pépité oZer's actions are based around several major themes. Pépité oZer's mission is both to raise awareness and to support students and young graduates in their entrepreneurial projects.

Various events are organised to raise awareness of entrepreneurship among students as part of a learning-by-doing approach.
